The book of Acts clarifies that Abraham left Haran after his father died. Again, we are using standardized years, and it must be realized that there is some offset with the factual years of age. However, there is a 1:1 correspondence between the factual years and the standardized years. For without this assumption, the scriptural chronology would not be computable. It is evident that it was made to be computable, so the assumption is proved valid. Further Abraham's 75th year = Terah's 205th year. For it is not reasonable to assume that Abraham had a birthday between his father's death and his departure. To keep the chronology computable always requires all the facts and the most probable assumption to go with it.

The dating of the 400 years from Isaac's birth is proved by the fact that four generations spanned the time in Egypt, 1. Jacob, 2. Levi, 3. Jocabed, 4. Moses. The 400 years includes the time that Abraham's "seed," Isaac, sojourned in

Canaan before Jacob went to Egypt. Israel was only in Egypt 210 years. The dating of 430 years in Exodus is from 30 years before Isaac was born, from the time that Abraham left Ur of the Chaldees, and adds the number of years that Abraham sojourned before Isaac was born. Other chronologers have assumed that the 400 years begins with the “weaning” of Isaac at age 5. This *ad hoc* assumption substitutes a questionable legal definition of “seed” for a factual and legal definition fulfilled at the birth of Isaac, and corrupts the Sabbatical alignment. The five year difference is to be located between Abraham’s sojourn out of Ur of the Chaldees and Terah’s becoming too old to travel so that they had to stop in Haran for those five years.

The red figures show when the chronology is being worked backwards in time. Israel began the conquest of Transjordan six months before they crossed the Jordan. It was then that they took Heshbon and occupied it for the next 300 years (Judges 11:26). So, I move the timeline forward by the 300 years, and then work it backward to fill in the details.
